

# USE & CARE INSTRUCTIONS

## Filling the Feeder

Step 1: Press the one-touch button by going under the roof to open the cap.

Step 2: Fill using the 3N1 Super Tote and avoid spilling and wasting seed.

Step 3: Snap the cap shut and enjoy.

## Cleaning the Feeder

If seed debris accumulates in the Base, use a Phillips-head screwdriver to undo the fasteners located on the sides of the metal Base. The Base can now slide off for cleaning. Reinstall by sliding the Base over the Tube and securing with the fasteners. Do not over-tighten. Make sure the Base is secure before filling or hanging. Wash the inside of the feeder with warm soapy water. Rinse thoroughly and allow to dry before use.

## Squirrel Proof Ports

Sliding metal cage closes all ports simultaneously when a squirrel's weight is applied to any perch or the roof.
