

USE & CARE INSTRUCTIONS

EASY TO FILL

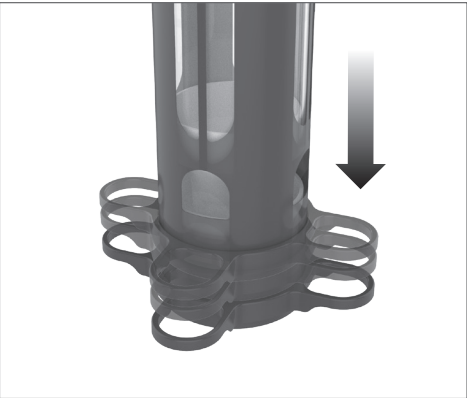

Wide top allows you to fill with ease.

Filling the Feeder

Step 1: Grab lid and slide up along the hanger cable.

Step 2: Pour seed into the wide top.

Step 3: Slide lid down hanger cable and nestle back into place within the sleeve. Cap should lay flush with the top of the feeder. Your feeder is now ready to hang.

Squirrel Proof Ports

Sliding metal sleeve closes all ports simultaneously when a squirrel's weight is applied to any perch or the roof.

Cleaning the Feeder

Step 1: Shake feeder to remove excess seed and debris out of the feeding ports. DO NOT turn the feeder upside-down as smaller seeds can get stuck in-between the shroud and tube, which can cause the feeder to stick.

Step 2: Hand wash with warm water and a mild antibacterial soap. Use a brush to help clean more efficiently. Rinse thoroughly and let dry completely before refilling with seed.

Use our squirrel feeders & accessories to deter squirrels from bird feeders
