

## ***Observer Window Feeder (OWF & OWF-S)***

**Cleaning:** Please for the sake of the birds, keep your feeders clean! Dirty feeders can harm the birds. Use a mild soap & water solution and a soft brush for thorough, simple cleaning. Dry completely before filling with seed, fruit or meal worms.

### **Disassemble**

1. Remove the feeder by gently lifting the edge of both suction cups on the base with your fingertips while holding the base. Lift the feeder gently upward off of the suction cup which was holding the top.
2. Remove the single suction cup by gently lifting the edge.
3. The top cannot be removed from the base for cleaning on this model.

### **Assemble**

1. Before placing the suction cups on a clean, dry window, rub a little oil from the side of your nose onto the suction cups before positioning the suction cups on the window.
2. Position and press the single suction cup which attaches to the top against the window at the desired height.
3. Gently hook the top onto the single suction cup using the notch on the backside of the top, while holding the base slightly away from the window. Once the top is secured, make certain that the base is level before pressing the base against the window.
