

Squirrel Guard (SQG & SQBK)

You can now keep those pesky squirrels away from your feeders and save seed! Built of quality materials, the Squirrel Guard will give you years of enjoyment.

The Squirrel Guard now comes completely assembled with a shorter brass rod and a snap hook located beneath the dome.

The brass rod can be reversed with the snap hook on top of the rod for different hanging applications as shown in the illustration.

1. Reverse the brass rod with the open loop on the bottom.
2. Slide the collar & set screw down the brass rod and tighten the set screw.
3. Insert the brass rod up through the hole in the dome.
4. Slide the rain guard down the brass rod, allowing the rain guard to rest on top of the dome.
5. Position the o-ring snugly against the rain guard to prevent rainwater from traveling down the brass rod.
6. Screw the snap hook onto the brass rod.
7. Adjust the dome by moving the collar & set screw up or down the brass rod. Reposition the o-ring against the rain guard.
